2.2.5. index.php?page=kontakt	12
2.2.6. index.php?page=admin_panel	14

3.Kodovi

3.1. HTML i PHP	14
3.2. JavaScript i JQuery I XML	43

4.Baza podataka	43
-----------------------	----

1.1.Korišćeni programski jezici

Prilokom izrade ovog sajta koristila sam:

- Html
- Css
- JavaScript
- JQuery plugin
- Ajax
- PHP
- MySql bazu podataka

Ceo sajt je rađen u Notepad++.

1.2.Opis funkcionalnosti

Sajt je namenjen za reklamiranje poslasticarnice. Sajt u mogu pristupiti neautorizovani i autorizovani korisnici kao i administrato

Administrator pri logovanju dobija stavku u meniju koja se zove *admin panel* gde on može da promeni, doda i briše podatke o telefonima i korisnicima.

Sav sadržaj sajta se vuče iz baze.

Logovanje je zaštićeno sesijama. Postoji link za registraciju koje vodi do strane registracija na kojoj korisnik može da se registruje.

Na sajtu postoji pretraga koja je realizovana Ajaxom. Pretraga se vrši na osnovu imena kolača. Kada korisnik ukuca početno slovo ispod polja za pretraga su pravi lista svih kolača koji počinju na zadato slovo. Kako korisnik nastavlja da kuca lista ponuđenih stavki se smanjuje. U slučaju da kolač ne postoji u bazi korisniku se ispisuje obaveštenje.

Galerija je realizovana pomoću lightbox-a i izlistava sve slike iz galerije. Na ovoj strani je urađeno straničenje.

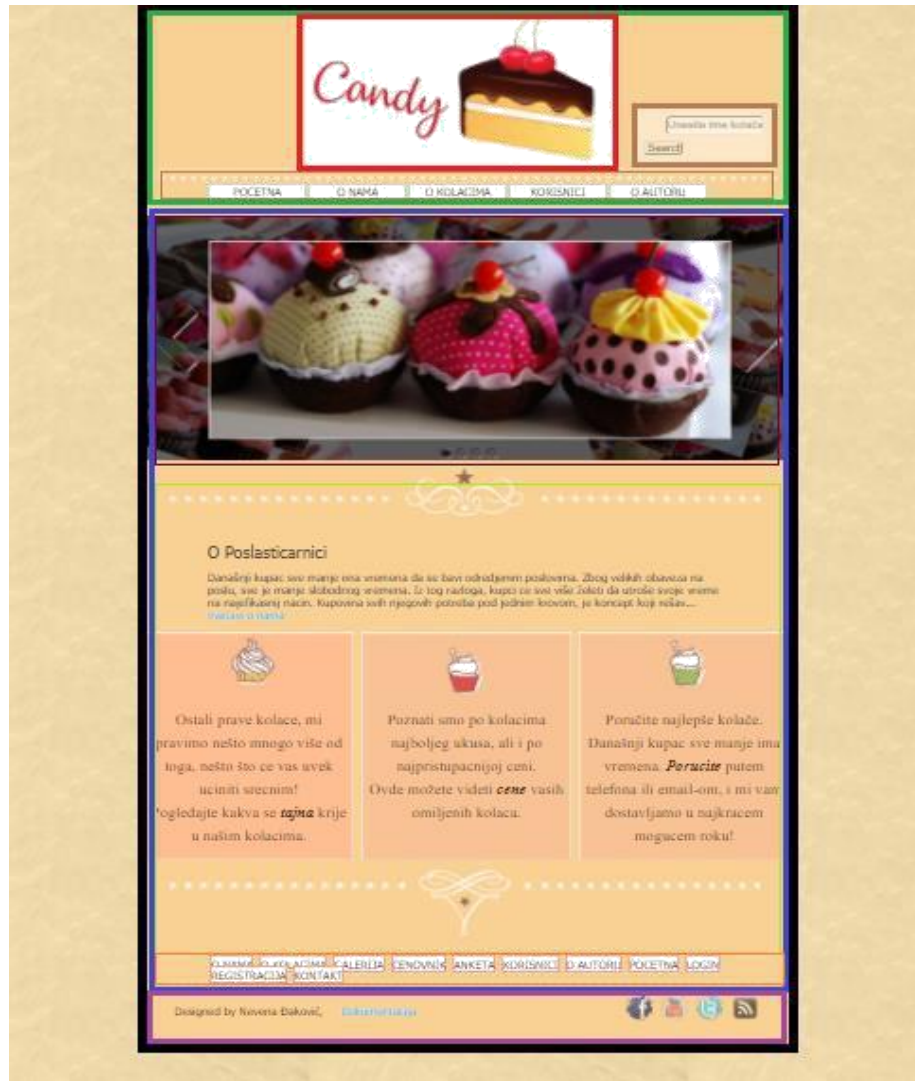

Meni sajta se takođe vuče iz baze i na njemu su realizovane neke jquery animacije. Prikaz stavki u meniju zavisi od toga ko je ulogovan na sajtu (korisnik ili administrator).

Anketa je urađena, takođe, Ajaxom. Glasovi se broje, a postoje i rezultati samo za administratora.

Admin panel, link u meniju koji vide samo administratori, urađena je Ajaxom. Izborom stavke administrator ima mogućnost da izbriše određenu stavku.

Takođe ima mogućnost da vidi rezultate ankete.

1.3.Template

```

2. Organizacija

2.1. Organizaciona šema

2.2. Stranice

2.2.1. index.php

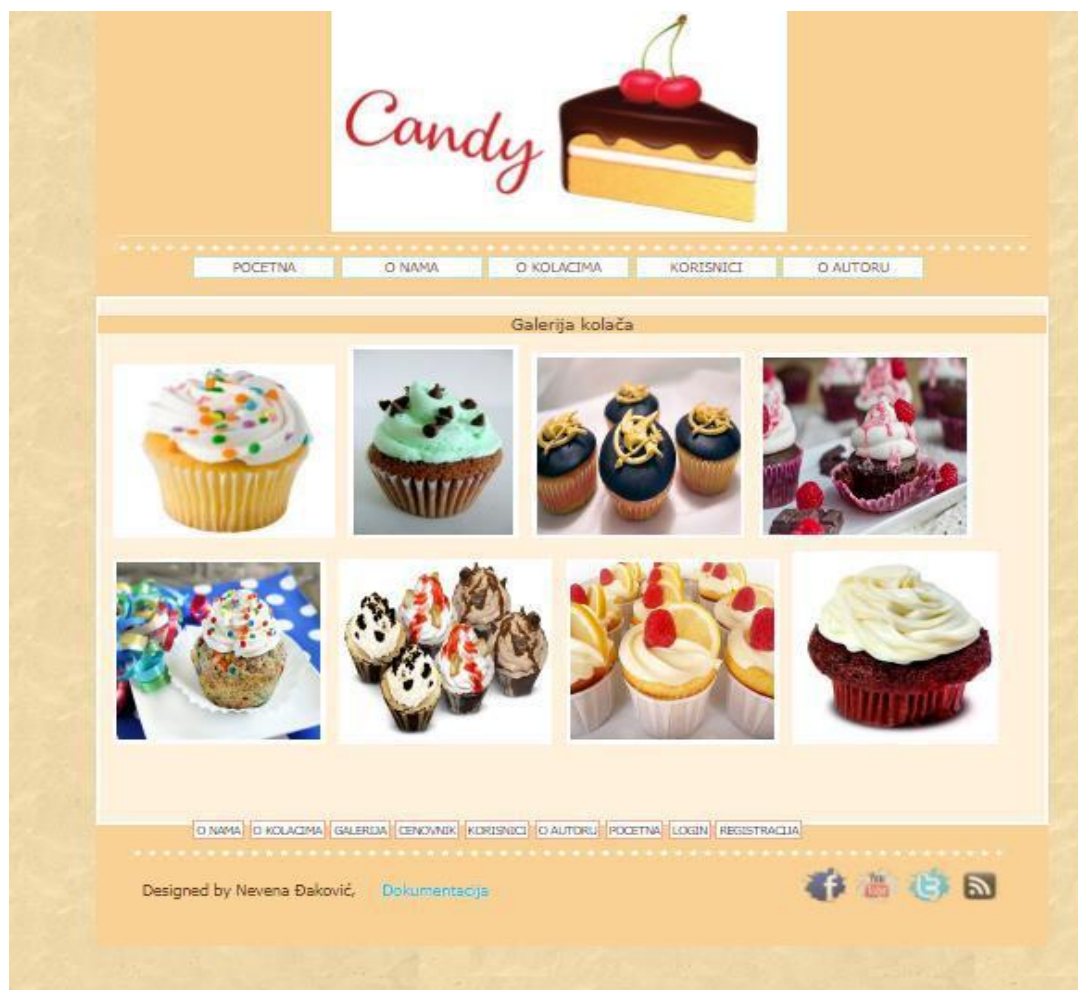

Index.php je stranica koja se otvara prilikom otvaranja sajta. Postoji dinamički meni koji čine linkovi ka galeriji, o nama, o kolacima koji dalje vodi na galeriju, cenovnik i anketu za ulogovanje korisnike, o autoru i korisnici koji vode na registraciju ili logovanje. Link *početna* je link ka index strani. Iznad menija je logo i naziv sajta. Klik na logo takođe vodi ka index strain.

Pretraga se vrši na osnovu imena kolača. Kada korisnik ukuca početno slovo ispod polja za pretraga su pravi lista svih kolača koji počinju na zadato slovo. Kako korisnik nastavlja da kuca lista ponuđenih stavki se smanjuje. U slučaju da kolač ne postoji u bazi korisniku se ispisuje obaveštenje.

U futeru ove strane nalaze si linkovi ka dokumentaciji sajta i autoru sajta. Strana o autoru sajta se otvara u centralnom delu sajta.

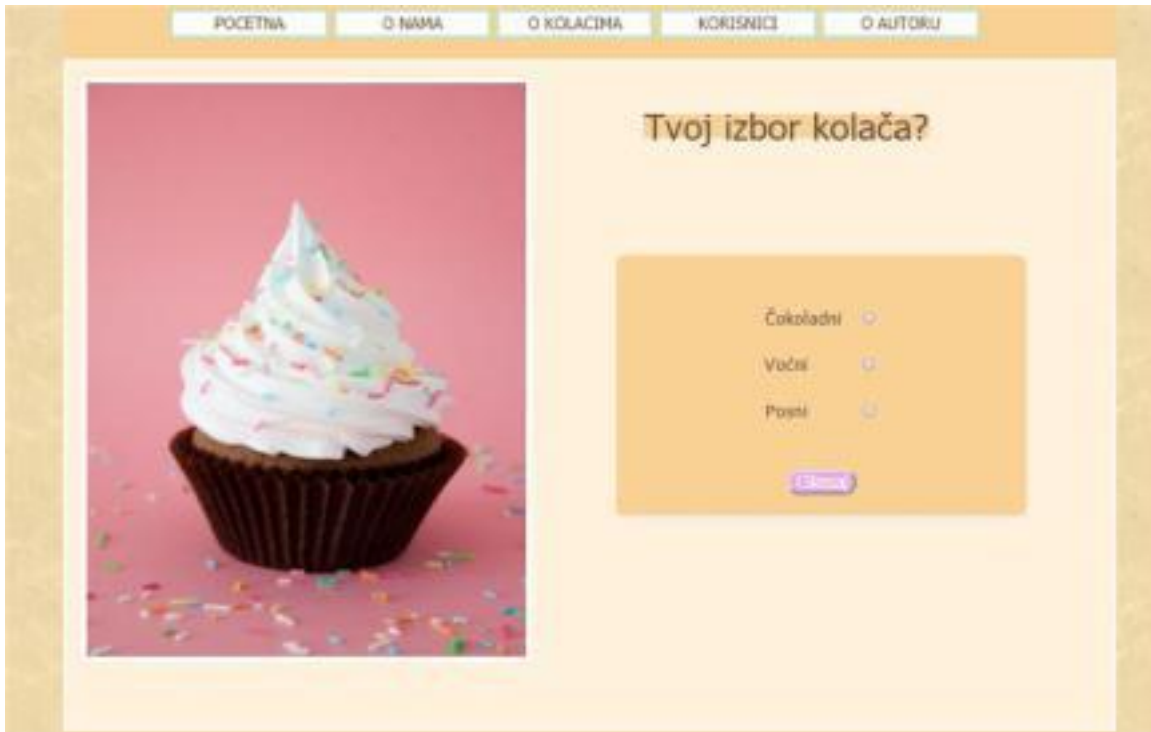

Takođe, u futeru, postoje brzi i korisni linkovi koji vode ka nekim stranama.

2.2.2. index.php?page=galerija

Galerija je realizovana pomoću lightbox-a i izlistava sve slike iz galerije, nju vide i autorizovani i neautorizovani korisnici sajta. Putanje svih slika se nalaze u bazi.

2.2.3. index.php?page=anketa

POČETNA O NAMA O KOLACIMA KORISNICI O AUTORU

Tvoj izbor kolača?

Čokoladni ☐

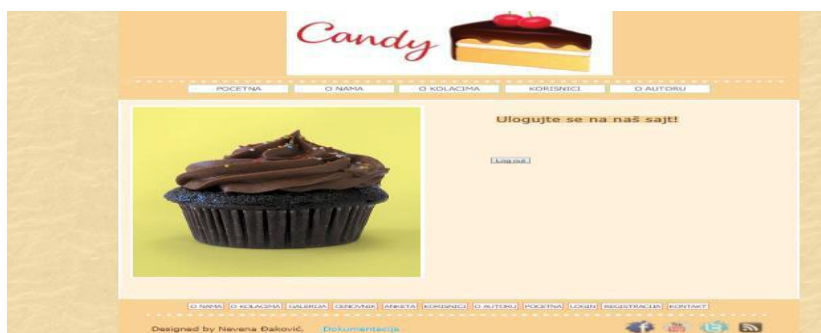

Voćni ☐

Posni ☐

Glasaj

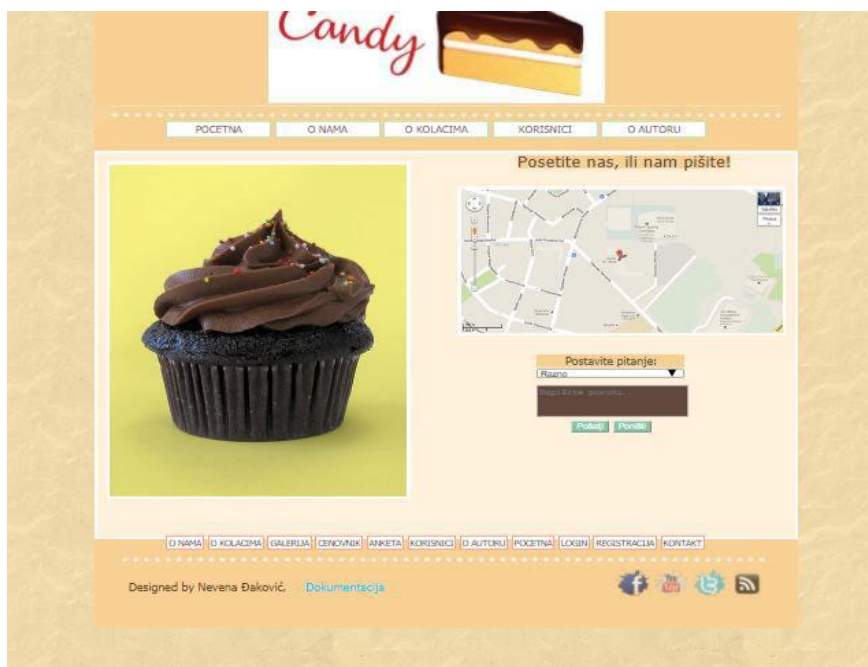

Anketa je urađena, takođe, Ajaxom. Glasovi se broje, a postoje i rezultati koje admin samo vidi. Sva pitanja i odgovori su upisani u bazu.

2.2.4. index.php?page=login

Ako je korisnik registrovan, loguje se. Ulogovanom korisniku omogućeno je popunjavanje ankete kao i kontakt i postavljanje pitanja autoru.

2.2.6. index.php?page=login

2.2.6. index.php?page=admin_panel

4. Baza

The screenshot displays a database management interface. On the left, a tree view shows the database structure, including tables like 'korisnici', 'poruke', 'stavke', 'uloge', 'anketa_opcije', 'anketa_rezultati', 'artikli', 'korisnici', 'meni_stavke', 'poruke', 'slike', 'uloge', 'information_schema', 'mysql', 'performance_schema', 'phpmyadmin', 'suncevisistem', and 'test'. The main window shows the 'korisnici' table structure with columns: id_korisnika (int(11), PRIMARY, AUTO_INCREMENT), kor_ime (varchar(30), latin1_swedish_ci), korisnik (varchar(30), latin1_swedish_ci), ime (varchar(30), latin1_swedish_ci), prezime (varchar(30), latin1_swedish_ci), pol (char(1), latin1_swedish_ci), grad (varchar(30), latin1_swedish_ci), email (varchar(50), latin1_swedish_ci), and id_uloge (int(11)). Below this, the 'poruke' table structure is shown with columns: id_poruke (int(11), PRIMARY, AUTO_INCREMENT), kategorija (varchar(30), latin1_swedish_ci), tekst (varchar(1000), latin1_swedish_ci), and id_korisnika (int(11)). The 'Indexes' section at the bottom shows the PRIMARY index on id_poruke.
